

The 9th International Conference on System Modeling and Optimization (ICSMO2021)

CALL FOR PAPERS

Budapest, Hungary | February 3-5, 2021

Conference Overview

The 9th International Conference on System Modeling and Optimization will be held in Budapest, Hungary on February 3-5, 2021. The conference will gather experts and scholars in the two major fields of system modeling and optimization to exchange and discuss current hot issues, and jointly promote the development of this field

Conference History

ICSMO 2020
Barcelona, Spain
February 12-15, 2020

ICSMO 2019
Rome, Italy
February 16-19, 2019

ICSMO2013~2020 conference papers were included in **International Journal of Modeling and Optimization (ISSN:2010-3697)**

More information about ICSMO2013~2020 [please click here](#)

Key Dates

2021	2021	2021
January	January	January
5	15	22
Submission Deadline	Notification Date	Registration Deadline

Publish Information

Accepted papers of ICSMO 2021 will be published in the **special issue** of **International Journal of Modeling and Optimization** (ISSN:2010-3697), which will be indexed by Engineering & Technology Digital Library, ProQuest, Crossref, Electronic Journals Library, DOAJ, Google Scholar, EI (INSPEC, IET).

Submission Topics

- Agent Based Simulation
- Bond Graph Modelling
- Databases and visualization
- Methodology and technology
- chaos Modelling, Control and Signal Transmission
- Computing and Simulation applications in education
- Computing and Simulation applications in military field
- Perceptual issues in visualization and modeling
- Pervasive computing and simulation technology
- High Performance Computing & Simulation
- Intelligent computing and simulation technology
- Modelling, Simulation and Control of Technological Processes
- Networked Modeling and Simulation technology
- Simulation, Experimental Science and Engineering
- Verification, Validation and Accreditation (VV&A) technology
- Parallel and distributed computing simulation
- Application technology
- Vision and Visualization
- Object-oriented simulation
- Knowledge-based simulation
